

Project Executable Files

Date	3 July 2026
Team ID	xxxxxxx
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

#	Deliverable	Status	Location
1	Source code — ML training pipeline	☒	train_model.py
2	Source code — Flask web application	☒	app.py
3	HTML templates	☒	templates/ (base, index, predict, history)
4	CSS theme	☒	static/css/style.css
5	JavaScript functionality	☒	static/js/script.js
6	Trained model artifact	☒	models/model.pkl (Random Forest)
7	Preprocessing artifacts	☒	models/scaler.pkl, models/encoder.pkl
8	Model comparison metadata	☒	models/metadata.pkl
9	EDA + experimentation notebook	☒	notebooks/Credit_Card_Approval_Analysis.ipynb
10	Python dependencies	☒	requirements.txt
11	Render deployment config	☒	Procfile, render.yaml
12	Project documentation (8 phases)	☒	docs/ folder
13	Project README	☒	README.md

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

Credit Card Approval Prediction/
├── app.py
├── train_model.py
├── requirements.txt
├── Procfile
├── render.yaml
├── .gitignore
├── README.md
├── templates/
│   ├── base.html
│   ├── index.html
│   ├── predict.html
│   └── history.html
├── static/
│   ├── css/style.css
│   └── js/script.js
├── models/
│   ├── model.pkl
│   ├── scaler.pkl
│   ├── encoder.pkl
│   └── metadata.pkl
├── notebooks/
│   └── Credit_Card_Approval_Analysis.ipynb
└── docs/
    ├── 1. Brainstorming & Ideation/
    ├── 2. Requirement Analysis/
    ├── 3. Project Design Phase/
    ├── 4. Project Planning Phase/
    ├── 5. Project Development Phase/
    ├── 6. Project Testing/
    ├── 7. Project Documentation/
    └── 8. Project Demonstration/
    
```

Step 3: Deployment / Access Details

Attribute	Detail
-----------	--------

Attribute	Detail
Live URL	https://credit-card-approval-prediction-ra22.onrender.com
GitHub Repository	https://github.com/saisatyasri/Credit-Card-Approval-Prediction
Hosting Platform	Render (free tier)
WSGI Server	Gunicorn 21.2.0
Start Command	gunicorn app:app
Auto-Deploy Trigger	Push to master branch on GitHub

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 1: Clone the repository

```
git clone https://github.com/saisatyasri/Credit-Card-Approval-Prediction.git
cd Credit-Card-Approval-Prediction
```

Step 2: Install dependencies

```
pip install -r requirements.txt
```

Step 3: Place dataset files in data/ directory

```
# data/application_record.csv
```

```
# data/credit_record.csv
```

```
# (Download from: https://www.kaggle.com/datasets/rikdifos/credit-card-approval-prediction)
```

Step 4: Train the model (generates models/*.pkl)

```
python train_model.py
```

Step 5: Start the Flask application

```
python app.py
```

```
# Open: http://127.0.0.1:5000
```
